

FCE Speaking Paper: The Key to Success (Step 7)

Suggested answer using the template in FCE Speaking Paper: The Key to Success (Step 5):

Why is the road important to us?

It seems to me what these two pictures have in common is *roads*. However, they do differ in some ways.

The first picture depicts *an empty country road*. In my opinion, this would be *a road that would be very important to people in rural areas so that they can access different services*. However, it may also be *an important road for transporting agricultural products to market towns*.

In contrast, the second picture shows *a traffic jam caused by road works*. From my point of view, this would be *a typical problem when living in urban areas as good roads are important for commuters living in the suburbs*.

To sum up, there may be *many reasons why roads are important to us*, but in my opinion, *the main reasons are probably that roads make it easy for us to commute to and from work, and they also give us access to services and goods*.
